Presidents Report

On Sunday 24th February we had our first event for the year. Nicola Smuts Allsop presented on “Fertility Astrology”. It’s a unique method of looking at the whole field of pregnancy, including the biology of pregnancy for both male and female partners, their natal charts from a traditional standpoint using the almuten of pregnancy and also looking at outer planetary transits and midpoints. She also gave some helpful tips on helping the client deal with the stress of IVF and other procedures which can cause prolonged stress on the families involved.

Unfortunately we only had about a dozen people attend, but all of those who did thoroughly enjoyed the whole four hour talk, particularly our traditional astrologers who now have another arrow in their quivers. Most members purchased Nicola’s book on Fertility Astrology plus we bought a copy for the library, so anyone who missed out can borrow the book from Margie who is our wonderful librarian.

Because Nicola was travelling through and could only come in February, we have had to juggle all the rest of the year’s talks. We have had a few confirmations of speakers since my last report so here is the proposed line-up:

March 31st – Jeannette Lewis-Hill – The 12 Tribes

May 12th – Rick Boyd – Edgar Cayce’s Astrology

June 23rd – Joy Usher – To be confirmed

August 4th - Jeannette Lewis-Hill – The medieval Humours

September 15th – Zane Stein – Chiron Transits

October 27th – Cate Whelan – 6th and 12th Houses

As you can see that’s an exciting program of events still to come, so hope you all can make it to some of these talks and I hope you are enjoying your new A4 format journals from the FAA. They are so much nicer and colourful to read than the old A5 style.

So let us all enjoy the rest of Jupiter’s transit through Sagittarius and until next newsletter,

Best wishes to all.

Jeff Farrow, President.

OUR NEXT EVENT.....

The Twelve-Tribe Nations that Lived by Astrology

A Journey in True Song and Symbol

With Jeanette Lewis-Hill

Did you know that there were nations all over the planet that were governed according to astrology? These nations combined the threads of astrology, cosmology, number and music to provide a paradise for their people. They were literally enchanted with notes that were determined by the planets.

Records of these civilisations exist. Plato wrote about them and concocted his own design for such a sacred landscape and population.

Iceland had one of the more recent such governments, and the 12 tribes of Israel are probably the best known example.

This talk draws much of its material from the research and writing of English specialist in ancient cultures John Michell, and his colleague in the project Christine Rhone.

Come and enjoy the study of applied astrology, enchantment by sacred music, and the subtle meaning of the solar '12' and the lunar '13.'

From the Editor.....

Many forms of astrology are evident throughout different cultures in the world.

I thought you might find the following interesting.

BURMESE ASTROLOGY

On a recent trip to Burma (Myanmar) I learned a little about Burmese Astrology.

In this system, the day of the week is the Prime indicator, so if for example you were born on a Monday, then the Moon is your planet and the Tiger is your animal.

This is important for the Burmese people as when they visit the local pagoda they seek the planetary pole surrounding the main stupa that is associated with their animal to make offerings.

It also indicates what is required of you. For example, if you were born on a Saturday, then every Saturday you would visit the local temple and sweep the grounds.

WHAT IS YOUR PLANET & SIGN ACCORDING TO THIS SYSTEM?

<u>Day of Week</u>	<u>Planet</u>	<u>Animal sign</u>	<u>Ruling Direction</u>
Monday	Moon	Tiger	East
Tuesday	Mars	Lion	SE
Wednesday (AM)	Mercury	Elephant with tusks	South
Wednesday (PM)	Rahu (Lunar Node)	Elephant without tusks	NW
Thursday	Jupiter	Rat	West
Friday	Venus	Guinea Pig	North
Saturday	Saturn	Dragon	SW
Sunday	Sun	Garuda	NE

Unfortunately I didn't have an opportunity to find out much more, however just for your own interest you may like to look up the Web and explore some of the sites on offer.
